

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date: 15-07-2026

Team ID: **23BFA05428**

Project Name: **Smart Library Request Workflow in ServiceNow**

Maximum Marks: 4 Marks

The system is designed to simplify library operations by automating request submission, approval, inventory management, and notifications.

FR	Requirement	Description
FR1	Book Search	Search books by title, author, category
FR2	Book Request	Submit borrowing requests
FR3	Approval	Approve or reject requests
FR4	Inventory	Update issue/return status
FR5	Notifications	Email and status updates
FR6	Reports	Borrowing and overdue analytics

Each functional module integrates with the ServiceNow platform to reduce manual effort and improve transparency. Students can track requests in real time, librarians maintain inventory, and administrators analyze operational metrics using dashboards.

Each functional module integrates with the ServiceNow platform to reduce manual effort and improve transparency. Students can track requests in real time, librarians maintain inventory, and administrators analyze operational metrics using dashboards.

Project Name: **Smart Library Request Workflow in ServiceNow**

Maximum Marks: 4 Marks

Requirement	Description
Usability	Simple interface
Security	RBAC, ACLs, HTTPS
Reliability	Accurate processing
Performance	Fast workflow execution
Availability	24×7 ServiceNow cloud
Scalability	Supports institutional growth

The application emphasizes security, reliability, and performance. Cloud deployment ensures high availability, while modular workflows make future enhancements and maintenance straightforward.
